# Nikolas Escobal

**SOFTWARE ENGINEER**

Remote | niko.escobal@gmail.com | github.com/nikoescobal

## SUMMARY

Full-stack engineer with a product mindset and experience co-founding startups. Extensive experience working cross-functionally with remote teams worldwide. AI-first in how I work, with coding agents as part of my process and human judgment at the center. Clojure enthusiast who enjoys building simple software that solves real problems.

## EXPERIENCE

**Full-Stack Software Engineer - Freelance / Contract** Jun 2020 - Present

Delivered 40+ frontend, backend, and full-stack projects.

*Selected engagements:*

**Win Labs** - U.S. · Remote Mar 2026 - Present

- Work directly with Win Labs' founder, founding engineer and ex-Director of Engineering at MasterClass. Build software for Arbor Lodging, a 30+ hotel operator with operations in the U.S. and Mexico under brands including Hilton, Marriott, Hyatt, and IHG.
- **Arrival Intelligence:** Built a full-stack GTM intelligence workflow for five hotels that turns hotel records into enriched prospects for sales review. Added session recovery, enrichment controls, and delivery tracking.
- **Timesheet Management:** Built time-record processing and break-premium rules, with browser readback to verify changes, employee-level error reporting, and report review and approval.

**CleverConsult** - Canada · Remote Jul 2026 - Present

- Work directly with the CTO on an AI platform that turns referral documents, recordings, and questionnaires into specialist clinical notes.
- Improved template previews, pipeline progress tracking, and source citations; fixed database connection and provider concurrency issues.

**MoreGoodDays** - Australia · Remote May - Sep 2026

- Moved reporting for five health programs from a laptop to scheduled cloud processing, with delivery checks and failure alerts.
- Integrated ClickUp, Intercom, and Aircall to synchronize client records, detect duplicates, and identify callers.
- Built and piloted a unified client dashboard for appointments, tasks, and communication history.

**Helpjuice -** U.S. · Remote Mar - Jun 2024

*Frontend Software Engineer*

Built the Wizardshot React landing page; customized LiquidJS/jQuery knowledge bases and fixed bugs.

**Legacy Network AG -** Switzerland · Remote Aug 2022 - Sep 2023

*Engineering, then Product Management*

Built React/Next.js web and community features; moved to product management in March 2023.

**Aceplace -** Dubai, UAE · Remote Mar 2022 - Feb 2023

*Frontend, QA & Product*

Built host dashboard features. Established the QA function from scratch; helped the team document and resolve 400+ bugs.

## SKILLS

**Frontend:** JavaScript, TypeScript, React, Next.js, HTML, CSS
**Backend:** Clojure/ClojureScript, Python/Django, Node.js/Bun, Ruby on Rails, PostgreSQL
**Tools:** Git, Playwright, Puppeteer, API integrations
**Agentic engineering:** Claude Code, Codex, context engineering, agent orchestration, automated verification

## EDUCATION

**Microverse** - Full-Stack Web Development Jun 2020 - Jan 2022
**Ateneo de Manila University** - AB Sociology-Anthropology Mar 2011 - May 2015

## TRAINING

AI Engineering Fellowship (Headstarter); Content Engineering Cohort (Advanced) (AirOps); GTM Engineering School (Cohort 3).
